

MANAGER IT INFRASTRUCTURE

The Bank is seeking a results-driven and technically proficient IT Infrastructure Manager to oversee the design, implementation and maintenance of the Bank's core infrastructure environment. The role is responsible for ensuring the stability and availability of all network and infrastructure components that support the Bank's operations.

Key Responsibilities

- Lead the planning, development, and management of the Bank's IT infrastructure, including networks, servers, storage, and data centre environments.
- Ensure optimal performance, reliability, and availability of all infrastructure supporting business-critical systems.
- Design and implement infrastructure strategies and capacity plans aligned with current and future business needs.
- Oversee lifecycle management, including upgrades, patching, and performance monitoring.
- Maintain robust disaster recovery and business continuity solutions to safeguard operations.
- Collaborate with the IT Cybersecurity, Systems, and Projects teams to ensure integration, compliance, and security across environments.
- Manage service providers, contracts, and SLAs to ensure quality and cost efficiency.
- Develop and enforce infrastructure policies, procedures, and standards.
- Lead, mentor, and develop the infrastructure team to drive operational excellence.
- Manage the infrastructure budget and ensure prudent resource utilization.

Education and Experience

- Bachelor's Degree in Information Technology, Computer Science, or a related field.
- Minimum of 5 years' experience in IT infrastructure management, with at least 3 years in a supervisory or managerial role.
- A relevant postgraduate qualification or professional certification (e.g. CCNP/CCIE, CISM, ITIL).

- Understanding of cloud computing and virtualization technologies (e.g., VMware, Hyper V, etc.)
- Proven experience in managing complex network and infrastructure environments, preferably within the banking or financial services sector.
- Strong knowledge of data centre operations, virtualization, cloud technologies, and enterprise networking.
- Demonstrated ability to manage vendors and deliver infrastructure projects on time and within budget.

Key Competencies

- High degree of confidentiality, integrity
- Effective communication and interpersonal skills.
- Ability to work under pressure and a good team player
- Strong focus on customer service and high-performance standards
- Familiarisation of PMBOK/PRINCE2 project management framework.
- Working knowledge of PCIDSS, ISO3800 and ISO3850 standards
- Understanding of COBIT5 Governance Framework
- Stakeholder engagement capabilities

Remuneration

The Bank offers a competitive market-related salary commensurate with the job.

Applications should be addressed to:

The Executive Manager Human Capital

P.O. Box 336
