WORK EXPERIENCE

IT Systems and Application Developer Officer

Status Capital Building Society

 Aug 2021 – Current

 Zulwini

- Performed systems and business analysis to identify opportunities for automating and improving business processes, recommending secure technical solutions aligned with business needs.
- Designed, implemented, and customized computer systems, including mobile and web applications integrated with ERP and core banking platforms while embedding cybersecurity-by-design principles.
- Developed RESTful APIs and middleware services with secure authentication, encryption, and access control to protect sensitive financial data and ensure data integrity.
- Maintained dashboards and reporting tools for monitoring operational efficiency, compliance tracking, and incident management, integrating alert mechanisms for system anomalies.
- Conducted root cause analysis on operational and cybersecurity incidents, implemented permanent solutions, and ensured vulnerabilities were mitigated proactively in line with ISO/IEC 27001.
- Collaborated with cross-functional teams to perform vulnerability assessments, review system configurations, and implement secure coding practices.
- Participated in IT audits, penetration testing reviews, and business continuity planning to strengthen the organization's cybersecurity posture.
- Provided end-user support, cybersecurity awareness training, and documentation to ensure secure system usage and compliance with data protection standards.

Data Protection Officer

Status Capital Building Society

 Jan 2023 – Current

 Zulwini

- Ensured company compliance with ISO/IEC 27001, GDPR-equivalent data protection standards, and Eswatini's regulatory cybersecurity framework.
- Oversaw digital initiatives to embed privacy-by-design and secure data handling in mobile, web, and backend systems.
- Coordinated incident response for data breaches and security alerts, ensuring swift containment, reporting, and remediation.
- Conducted data protection impact assessments (DPIAs) for new technologies and integrations, advising on risk mitigation strategies.
- Delivered cybersecurity and privacy training to staff, emphasizing secure communication, access management, and incident reporting procedures.

LIFE PHILOSOPHY

"Securing digital transformation through resilience, innovation, and trust."

MOST PROUD OF

Mobile App (iOS & Android)

Empowered thousands of users with secure mobile banking.

Internal Operations Portal

Automated manual workflows, saving 40% processing time.

Process Automation

Improved OEE through workflow automation.

USSD Integration

Enabled mobile-based approvals and real-time transactions.

STRENGTHS

Mbalenhle Christian Academy

 Mbabane

- ICT Officer

Mbabane

- ## Full Stack Developer

Manzini

- Conducted systems and business analysis to identify opportunities for secure process automation and technical improvements across web, financial, and enterprise systems.
- Designed, implemented, and maintained full-stack applications with end-to-end security controls — including role-based access, secure API authentication, and database encryption.
- Integrated secure communication protocols (HTTPS/TLS) across client-server applications to prevent interception and data leaks.
- Conducted internal vulnerability scanning, patching, and security reviews to maintain system resilience against cyber threats.
- Collaborated with stakeholders to define secure software requirements, perform risk assessments, and participate in testing of data-critical modules.
- Participated in IT governance initiatives to align system development with cybersecurity policies and best practices.

LANGUAGES

EDUCATION

Honors in Applied Data Science: Scientific Computing & Python

WorldQuant University

📅 2020

Credly Badge

B.Sc. in Computer Science & Physics

University of Eswatini

📅 Sept 2010 – June 2014

Certification in Business Entrepreneurship

University of Eswatini

📅 2014

Diploma in Cyber Security

DIGITAL TRANSFORMATION & PROJECTS

HireAI – Intelligent CV Matching

mkhululimotha.com/hrassistantai

- Built an AI-powered recruitment assistant that matches CVs to job descriptions using advanced NLP and LLMs.
 - Combined cosine similarity, embeddings, and large language models (LLMs) to deliver accurate, context-aware candidate–job alignment.
 - Improved recruitment efficiency by automating CV screening and providing actionable insights for HR teams.
 - Secured backend endpoints and API access with authentication, encryption, and controlled data exposure.
-

AI Chatbot – RAG Solution

mkhululimotha.com/ragsolution

- Developed an AI-powered chatbot for document intelligence, enabling semantic search, predictive Q&A, and analytics using RAG (Retrieval-Augmented Generation).
 - Integrated LangChain, ChromaDB, and FastAPI to build a scalable backend supporting embeddings-based retrieval and interactive dashboards.
 - Enhanced information access and decision-making by allowing users to query large document sets with contextual understanding.
 - Implemented API key security, request validation, and logging to detect anomalous behavior.
-

USSD (*7227#) Integration

MTN Eswatini

- Integrated MTN APIs with ERP systems for real-time mobile transactions.
 - Enabled MoMo wallet transfers, balance checks, and loan applications.
 - Applied secure data transmission using HTTPS, token-based authentication, and transaction integrity checks.
-

SpheExpress eCommerce Platform

mkhululimotha.com/spheexpress

- Built a full-stack eCommerce solution with workflow automation and Stripe integration.
 - Applied digital transformation principles for business process standardisation.
 - Incorporated cybersecurity controls for secure payments, session management, and data encryption.
-

Mobile Banking Applications (iOS & Android) - Status Capital Building Society

- Developed secure mobile apps enabling customers to perform financial transactions.
- Implemented offline-first features for operations in low connectivity environments.

- Integrated with ERP and core banking systems for real-time workflows.
 - Implemented cybersecurity measures such as encrypted communication, secure authentication, and real-time monitoring to prevent unauthorized access and data breaches.
-

Internal Operations Portal - Status Capital Building Society

- Automated customer onboarding, approvals, and reporting processes.
 - Integrated ERP and core banking systems for live workflow monitoring.
 - Embedded access control, audit logging, and role-based permissions to enhance data protection.
-

Automated Payment Service – Status Capital Building Society

- Implemented workflow automation for loan repayments and disbursements.
- Reduced manual intervention and aligned with financial compliance.
- Ensured payment API security with token-based validation and audit trails.
